

- Did you know:
 - Liquid nutritional lose up to 80% of their vitamin content during pasteurization or aseptic heat processing?
 - Liquid suspension, UV rays, light, temperature fluctuations, chemicals, time and acid are all effective nutrition killers?
 - Sugar and caffeine are addictive substances! In some countries, caffeinated energy drinks are available only at pharmacies.
 - There are over 16,000 food additives currently in the U.S. food supply?
 - Manufacturers routinely use nutrient killing, hot-fill processes and chemical preservatives to artificially extend shelf-life?
 - Almost everything we consume is highly acidic, and an acidic environment within the body encourages degenerative disease?

Welcome to the Yoli Revolution!

- Here at Yoli, we've decided that it's time for the truth - the truth about nutrition, about health... and, more importantly, our quality of life. And the truth is that a lot of what we're told about health and health products doesn't add up. We're told that nutritional supplements are good for us, and yet up to 80% of that goodness is destroyed in processing. So what is the truth? Here at Yoli, we're all about telling the truth:
- Nutrients suspended in liquid, heat processed and chemically preserved are nutritionally dead
- Caffeine, taurine and sugar are addictive and do not belong in nutritional supplements
- It's time for a change - a revolution - in the way we think about nutrition and health

At last... the TRUTH™

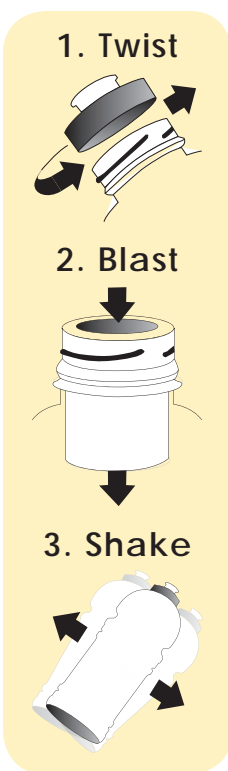

Yoli Blast Caps®...

Serious Nutrition Made Fun!

Our patented Blast Cap technology makes everyone smile. We were searching for a way to get pure, healthy nutrients without the sugar, preservatives and heat processing that leaves almost all supplements nutritionally depleted.

What we've discovered is a fun, easy way to get and stay healthy in three easy steps: Twist, Blast and Shake™ and then enjoy!

Welcome to the Yoli Revolution!

Yoli was founded on the belief that life and health are precious, and that we have a solution to the global health crisis that surrounds us. That solution is Yoli's patented Blast Cap®.

- Legendary nutrients are carefully harvested at their nutritional peak
- Each is flash freeze-dried to preserve and concentrate its nutrient profile
- Nutrients are combined in powerful formulas that address daily health challenges
- Single servings are sealed inside Yoli Blast Caps, protecting them from air, light, heat and moisture, with no need for chemical preservatives
- All that's left is to Twist, Blast and Shake™ your way to vibrant health!

10 top reasons you'll get more out of life with Yoli

Patented Blast Cap® Technology

The Patented Solution to the Nutritional Crisis
Twist, Blast and Shake™ - it's the revolutionary solution to nutrient depleted liquid, encapsulated and tableted nutritional. With Yoli's patented Blast Cap, you'll get up to 80% more nutrition than traditional liquid nutritional. By selecting ingredients at their peak, flash-freezing them, and sealing them away from the damage done by air, water and light, Blast Caps give you and your family the nutrition you've paid for... and the nutrition you need.

Live, Active Ingredients

Stop the Killing!

Do you know that most liquid beverages may have just a fraction of the nutrients listed on the label? Why? Heat. Light. Time. Close to 100% of liquid nutritional are processed at 161° - 295° to extend shelf life. And what happens to all that nutrition when you boil it? You guessed it! By freeze-drying and sealing the freshest ingredients, Yoli's nutrients are alive and vital. Vitamins like A, C, D, E and all the B Vitamins, waiting safe, sound and alive in every one of our Yoli Blast Caps.

Naturally Derived Ingredients

Get the Best of Nature on a Whole New Level

At Yoli, we have a passion for natural ingredients, so each of our Blast Caps is loaded with lots of them. Our formulators specialize in capturing, condensing and delivering nutrients at optimal levels and then blending them in formulas that are naturally derived - no acidic chemical fillers or artificial binding agents here. Experience nature on a whole new level.

Alka-Plex® Patented Formula

Acid Stress - What You Need to Know

Acid stress is the buildup of metabolic acid wastes that damage your body and feed free-radical production... leading to fatigue, illness, and, eventually, cellular degeneration. Patented Alka-Plex®, found in every Yoli Blast Cap, uses healthy minerals to neutralize acidic liquid without damaging the nutrients.

No Toxic Stimulants

Caffeine Addicts

Doctors and researchers agree - caffeine is the new tobacco. Highly addictive and damaging to health, millions suffer the daily chemical rollercoaster of jitters and fatigue. It's time for a new approach: Give the body the Yoli Blast Cap nutrition it craves and the sleep and exercise it wants, and it will produce all the natural, lasting energy you need - and the side effect of our "Energy Drinks"? True, lasting health.

Natural Flavors and Colors

Nature - Nothing Looks or Tastes Better

Mass-market products use artificial colors and flavors - they're cheap, and they'll last for years. What they do to your body is another story. Instead of ignoring natural ingredients, we celebrate them. The sweetness of summer... flavors that burst in your mouth... colors as pure as the sunrise. Capturing nature in a Blast Cap takes work, sure. Is it worth it? Oh, yeah.

Low Glycemic High ORAC Values

Get to Know the Numbers

You may not have heard of the Glycemic Index, but you feel it every day. It measures the sugars in food - and the dangerous swings in blood sugar that lead to vessel damage. ORAC values are the amount of free-radical fighting antioxidants in a food or supplement. Yoli Blast Caps are tops in ORAC values and barely register on the Glycemic Index.*

No Sugar or Artificial Sweeteners

Stop the Sugar Rush... and the Rush to Deadly Disease

Sugar... the number one culprit in America's obesity epidemic. With 12 teaspoons in a typical 12 oz. soda, it's no wonder kids as young as age six show symptoms of cellular degeneration. And let's not even mention toxic artificial sweeteners. The Yoli answer? Stevia Reb-A. Stevia, a member of the chrysanthemum family, is the perfect option to fattening and tooth-rotting sugars and high fructose corn syrup. And Reb-A is the sweetest part of Stevia with all the sweet and none of the bitter. Best of all - it is a completely natural, safe solution to those sugar cravings.

No Preservatives

All of the Nutrition, None of the Chemical Additives

Here's an interesting truism... If you don't expose nutrients to nutrient killers: liquid suspension, UV rays, light, time,

temperature fluctuations, chemicals and acids, you don't need to load them up with preservatives. That sounded like a good deal to us, but until our patented Blast Cap revolutionized the nutritional industry, we didn't have many options. Now, Yoli delivers to you and your family top-grade nutrients, minus preservatives, that are as pure and healthy as the day they were picked. Cold-processed, flash frozen, and ready for blasting!

Specialty Formulas

Optimal Nutrition Requires a Global Approach

Nutrient depleted soils, free-radical attack and environment pollution add up to a global nutritional crisis. And the solution to this crisis must be a global one. At Yoli, we travel the world, seeking out the best of what nature has to offer. Each nutrient is specially selected for one of our formulas. Each formula addresses a specific health need. The result? Top-grade nutrients in optimized formulations, preserved in Blast Caps, deliver products that do what we promise... every time... guaranteed.
